Accountable Infrastructure in Indonesia

Contact us

Transparency International Indonesia (TII) has been using the Infrastructure Corruption Risks Assessment Tool (ICRAT) since 2022 to assess and monitor major infrastructure projects for corruption risks. 

Some of Indonesia's ICRAT project reports can be viewed below:

- Balang Island Bridge
- Jakarta-Bandung Fast Train Project

TII now continues its work under the [global infrastructure programme](#) supported by Transparency International Australia and funded by the UK Government.

The global infrastructure project fact sheet can be accessed [here](#). To read about the work being conducted in the four other participating countries in this project, visit the [project page](#).
