Qualifications and Cost-Based Selection of Consultant 1st Ed (2023)

(L)

Qualifications and Cost-Based Selection of Consultant 1st Ed (2023)

FIDIC supports the concept of fair and open competition in the selection of Consultants. In doing so, it notes that the competition should be focused on the selection criteria, which deliver the best outcome for the Clients. In professional services, competition drives innovation and efficiency which enhances the performance of infrastructure and the environment for all stakeholders.

More and more, the importance of long-term project performance, operation and maintenance costs and sustainability are being recognised as major factors in assessing project success.
